
Technical Data Sheet

Page 1 of 1

Properties:	AKEMI® Thinner S is a reactive thinner based on styrene. The product is characterized by the following properties: - very good dilution effect - free of methanol, CHC, aromatic and paraffinic solvents - free of regenerating solutions
Application Area:	AKEMI® Thinner S is used to adjust the consistency of AKEMI® Marble Fillers 1000, Marble Filler Super, UV-Fillers, AKS-System Fillers, MS 76 Stone and Marble Adhesives as well as Superfast Volume Filler.
Instructions for Use:	1. Add AKEMI® Thinner S to the product before hardener addition. 2. Maximum quantity of dilution: 8% for Marble Filler Transparent and Transparent Waterclear, 3% for all other products.
Special Notes:	For adequate waste disposal container must be completely emptied.
Storage:	6 months approximately if stored in cool condition in its closed original container.
Health & Safety:	Read Material Safety Data Sheet before handling or using this product.
Important Notice:	The above information is based on the latest stage of development and application technology. Due to a multiplicity of different influencing factors, this information – as well as other oral or written technical advises – must be considered as non-binding hints. The user is obliged in each particular case to conduct performance tests, including but not limited to trials of the product, in an inconspicuous area or fabrication of a sample piece.
